Office Action Summary

Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to hydrogenated starch hydrolysate and products, classified in class 127, subclass 29.
- II. Claims 14-18, drawn to encapsulated particles, classified in class 264, subclass 4.
- III. Claims 19-23, drawn to a flavorant composition, classified in class 426, subclass 650.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in pharmaceuticals. Invention II has a separate utility such as in cosmetics. Invention III has a separate utility such as in meat products. Also, Inventions II and III do not require the specific hydrogenated starch hydrolysate of Invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

**NOTE** that Group I contains claims directed to the following patentably distinct species of the claimed invention: **a)** claims 9-11, the starch hydrolysate in sugarless hard boiled candy, **b)** claim 12, the starch hydrolysate mixed with additional additives listed in paragraph B, and **c)** claim 13, the starch hydrolysate as a coating on malic acid or a mixture of acidulents.

Art Unit: 1761

If Group I is elected, applicant is further required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-8 are generic to Group I.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

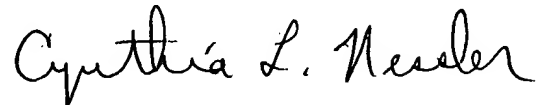

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
